Schedule and Pricing

The 2009 Meat Industry Scheme (09MIS) operates over twelve months, commencing January 2009. Samples are shipped as two sets of six. The program is designed for abattoir and other laboratories testing carcass hygiene or meat samples, and satisfies the export requirements set down by AQIS.

Over the course of the scheme, there will be positive and negative samples for the target analytes, as well as varying concentrations and background flora. For this reason, the scheme cannot be purchased as individual months.

For those laboratories required to test water samples, 09CSPm offers two rounds from the Water Microbiology Check Sample Program (08CSP or 09CSP as appropriate). This option is recommended for laboratories that test less than 20 water samples per month and have a limited scope of testing (i.e. SPC, Coliforms, *E.coli*). Laboratories performing more water testing should participate in the complete Water Microbiology Check Sample Program (09CSP).

	Meat Industry	
Program Name	Meat Industry Scheme	Water Check Sample
Order Code	09MIS	09CSPm
Dispatch Date	12 Jan 2009/22 Jun 2009	12 Jan 2009/22 Jun 2009
Sample Format	Freeze-dried (12 samples)	Freeze-dried (2 samples)
Testing Regime	1 sample/month	1 Sample every 6 months (Feb 09 and Aug 09)
Price (ex GST)	AUD\$750 (ONLY \$62.50/round)	AUD\$150 (ONLY \$75.00/round)

Tests	
Plate Count	ü
Salmonella	ü
E.coli 0157	ü
E.coli	ü
Coliforms	ü
